

PARASOLEIL DATA SHEET

Eclipse 2.0 Shade Systems

Turnkey Architectural Shade System

Pre-engineered, all-aluminum system for commercial shade applications that features modular design flexibility, corrosion resistant components, and integrated artistic patterned panels. Installs as a turnkey kit with clean lines, precise fit, and architectural grade performance.

PATTERNED PANELS

- Over 100 artistic pattern options to meet design intent
- 1/8" thick 5000-series aluminum for strength and durability
- Factory cut holes for direct mount fastening with PDH screws
- Choose from a curated library or work with our design team to meet project goals.

FINISH OPTIONS

- Architectural-grade and corrosion-resistant for long-term performance
- AAMA 2604 powder coats over base coat zinc primer
- **Panels:** Wide range of proprietary powder coats
- **Structure:** Graftone, Dark Ash, or Cast Iron color options

STRUCTURE

- 6000 series extruded aluminum frame
- Hidden fastener connections for a clean, seamless appearance
- System performance rating: **62 PSF (ASD)**
- Base plate covers to hide bolted base plates
- Component cutouts to accommodate electrical wiring
- Vertical side screens mounted to columns on 12' side

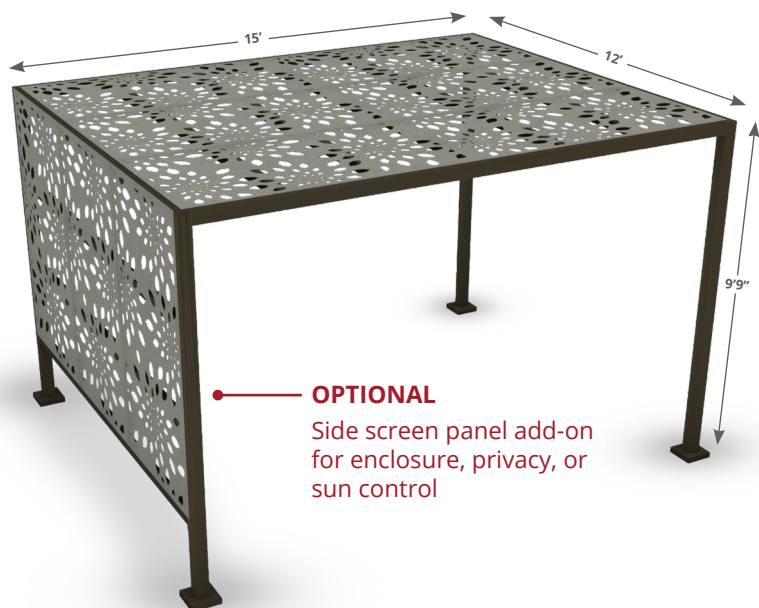

PRODUCT EXCLUSIONS

- Concrete footing design & engineering – available for certain projects for additional charge
- Concrete anchor bolts
- Concrete footing engineering
- Installation or site field verification
- Electrical layout, fixtures, or contractor support

Please see warranty information on our website or contact us directly.

12' x 15' Modular Shade System

Examples shown below illustrate typical configurations using the modular frame system. Layout flexibility allows multiple shaded zones using shared columns and beam connections.

Column: 4" x 4"

Beam: 4" x 4"

Rafter: 3" x 3"

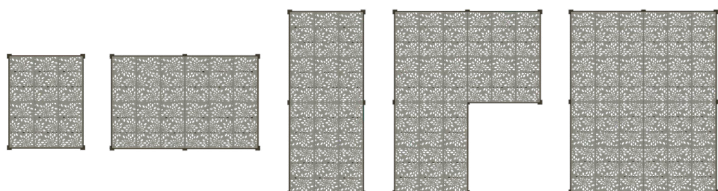

SUBMITTALS PROVIDED

- Pre-engineered fabrication drawings
- Component profiles, layouts, and connection details
- Finish samples for panels and structure

INSTALLATION

- All components pre-cut, drilled, and finished—no field cutting or welding
- Clear layout guidance provided
- Connections designed for standard expansion anchors or embedded threaded rods (provided by others)

MULTIPLE LAYOUT CONFIGURATIONS (TOP VIEW)

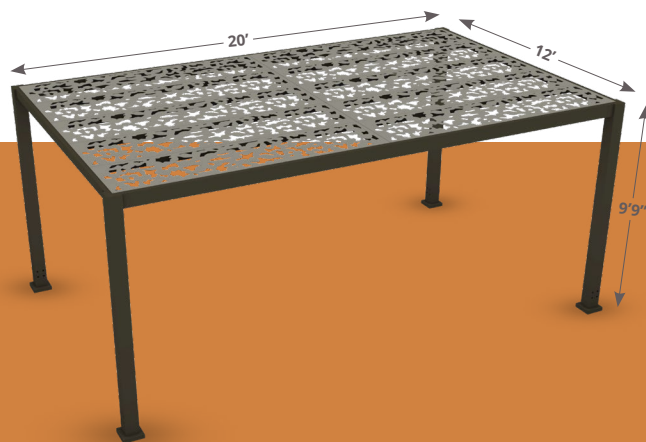

12' x 20' Non-Modular Shade System

If you need more coverage in one structure, the 12' x 20' non-modular structure is also available for larger footprints.

Column: 6" x 6"

Beam: 4" x 4" on 12' side
6" x 4" on 20' side

Rafter: 3" x 3"
