Serpentine© (SRP)

With undulating lines moving up and down in sinusoidal fashion, this pattern screams of movement – movement across time and space, at different paces depending on what part of the pattern you focus on. Different shapes of different sizes stand out, while at the same time the whole pattern fades into the background when laid behind a feature image of solid material – a background with motion – Serpentine is the answer.

Shade Score	2/10
Privacy Score	4/10
