

Parasoleil For Commercial Exteriors

Creating places where people want to be

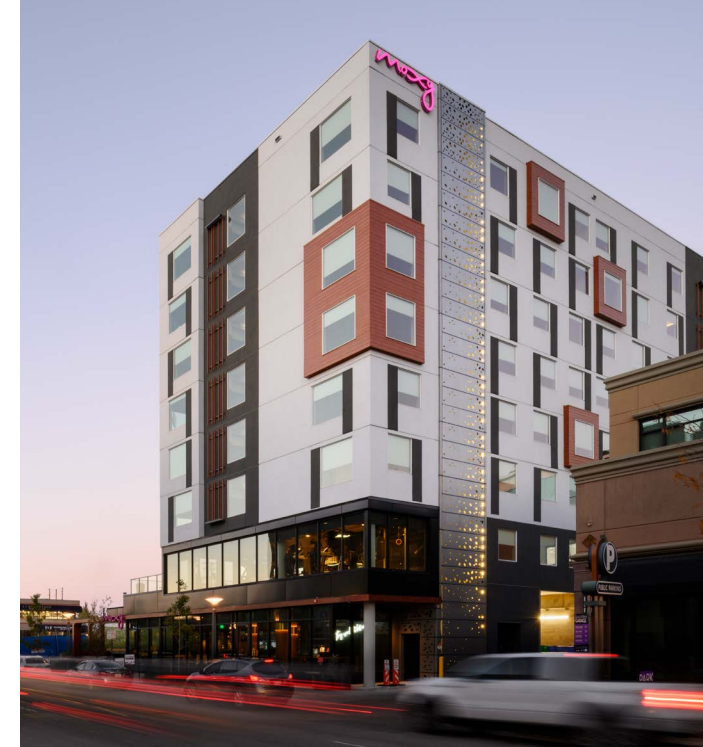

Parasoleil

Parasoleil was founded in 2004 by Colorado-based metal sculptor Uriah Bueller. With a primary goal to build a company that could provide tools to bridge art and the built environment to the architecture and design community, Parasoleil became the way to create places where people want to be. By commercializing his artistic process, architects can now utilize custom patterns, unique patina powdercoat finishes, and durable aluminum product systems to add a signature design element.

Elevate the Outdoors with Art

Why Parasoleil?

With the increasing desire to blur the lines between the indoors and outdoors, transitional space has never been more critical. Parasoleil panels provide the bridge between; diffusing light, inviting movement, and satisfying our intrinsic need to reconnect with nature.

WE ARE THE PATTERN PEOPLE

Rooted in a foundation of metal art, we have the deepest and most extensive understanding in the industry of how a pattern impacts a space, as well as how a pattern will perform structurally.

WE MAKE THE CUSTOM EXPERIENCE EASY

With prorprietary digital design software and built-in engineering, we are your expert partners in pattern and panel system customization.

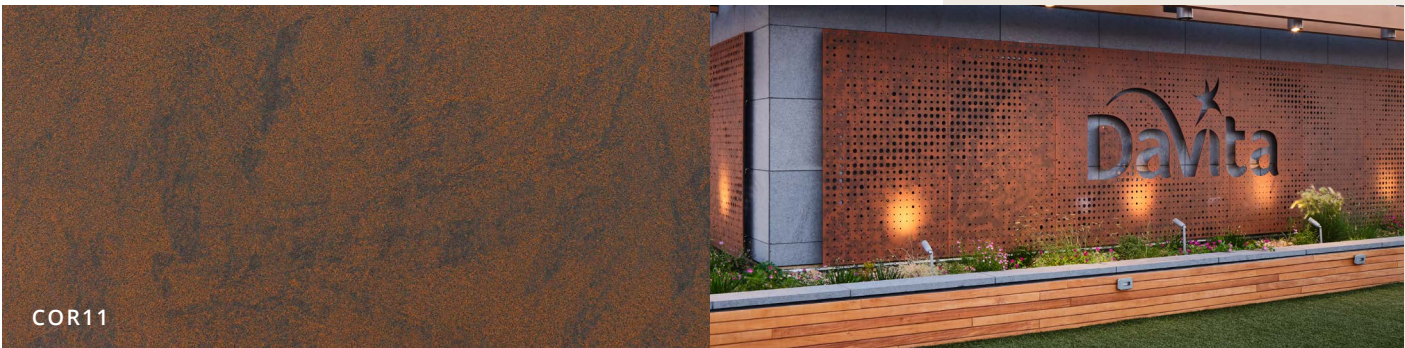

WE ARE YOUR PROJECT ADVOCATES, START TO FINISH

We're in your corner from the beginning to ensure that your design vision becomes a reality and makes it from specification all the way through to installation without delay.

Award-Winning Patina Finishes

Cladding Open-Air Enclosures

BENEFITS

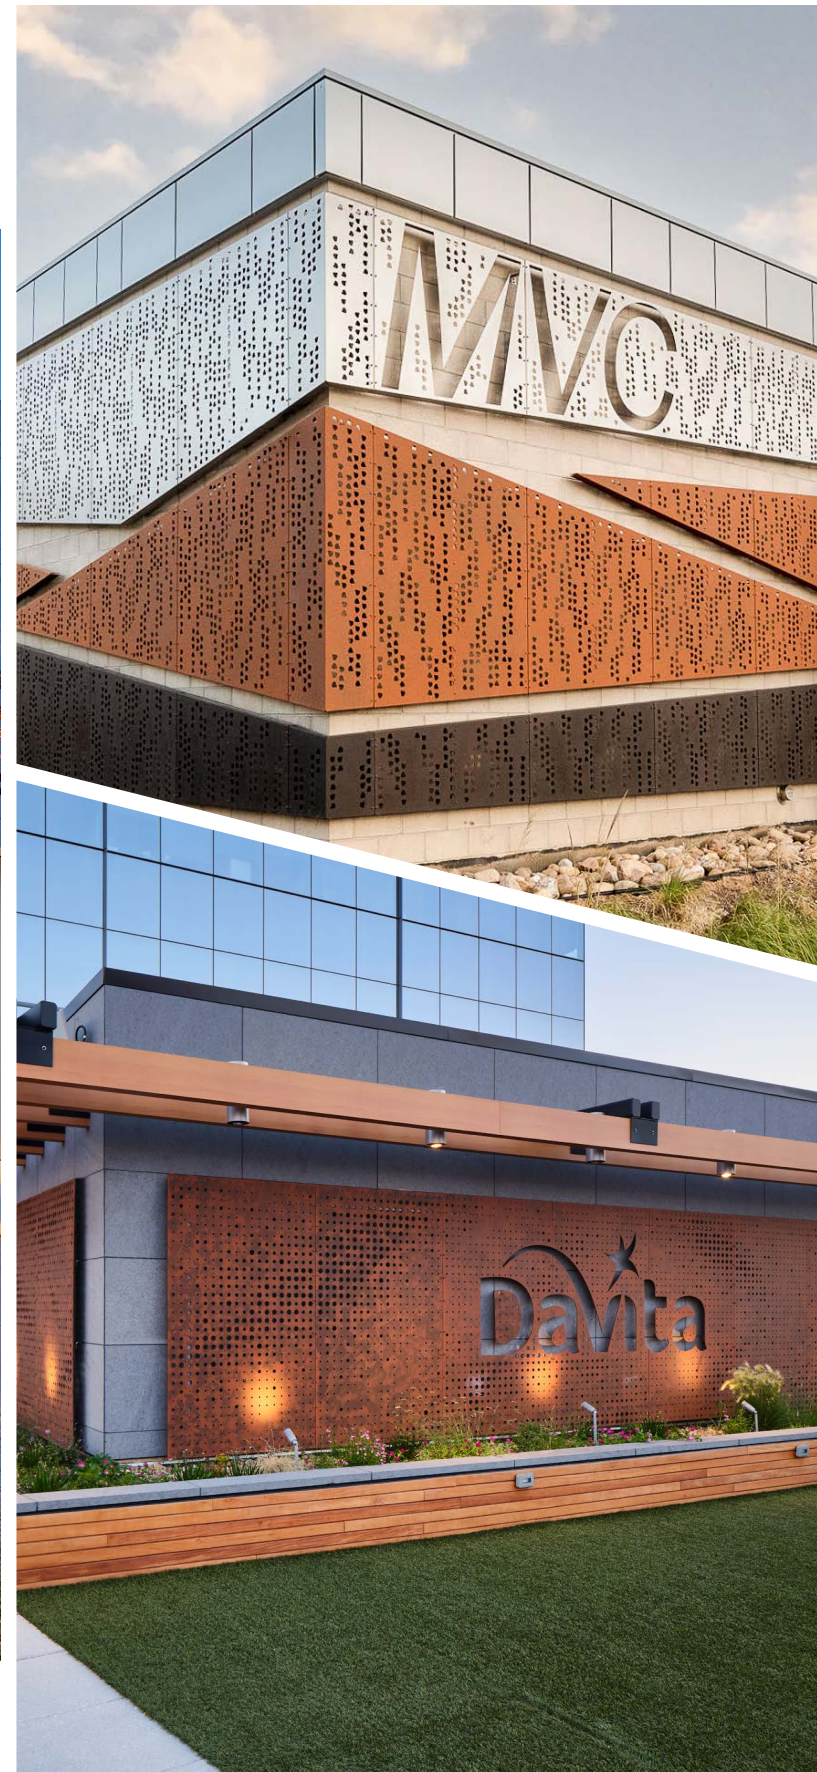

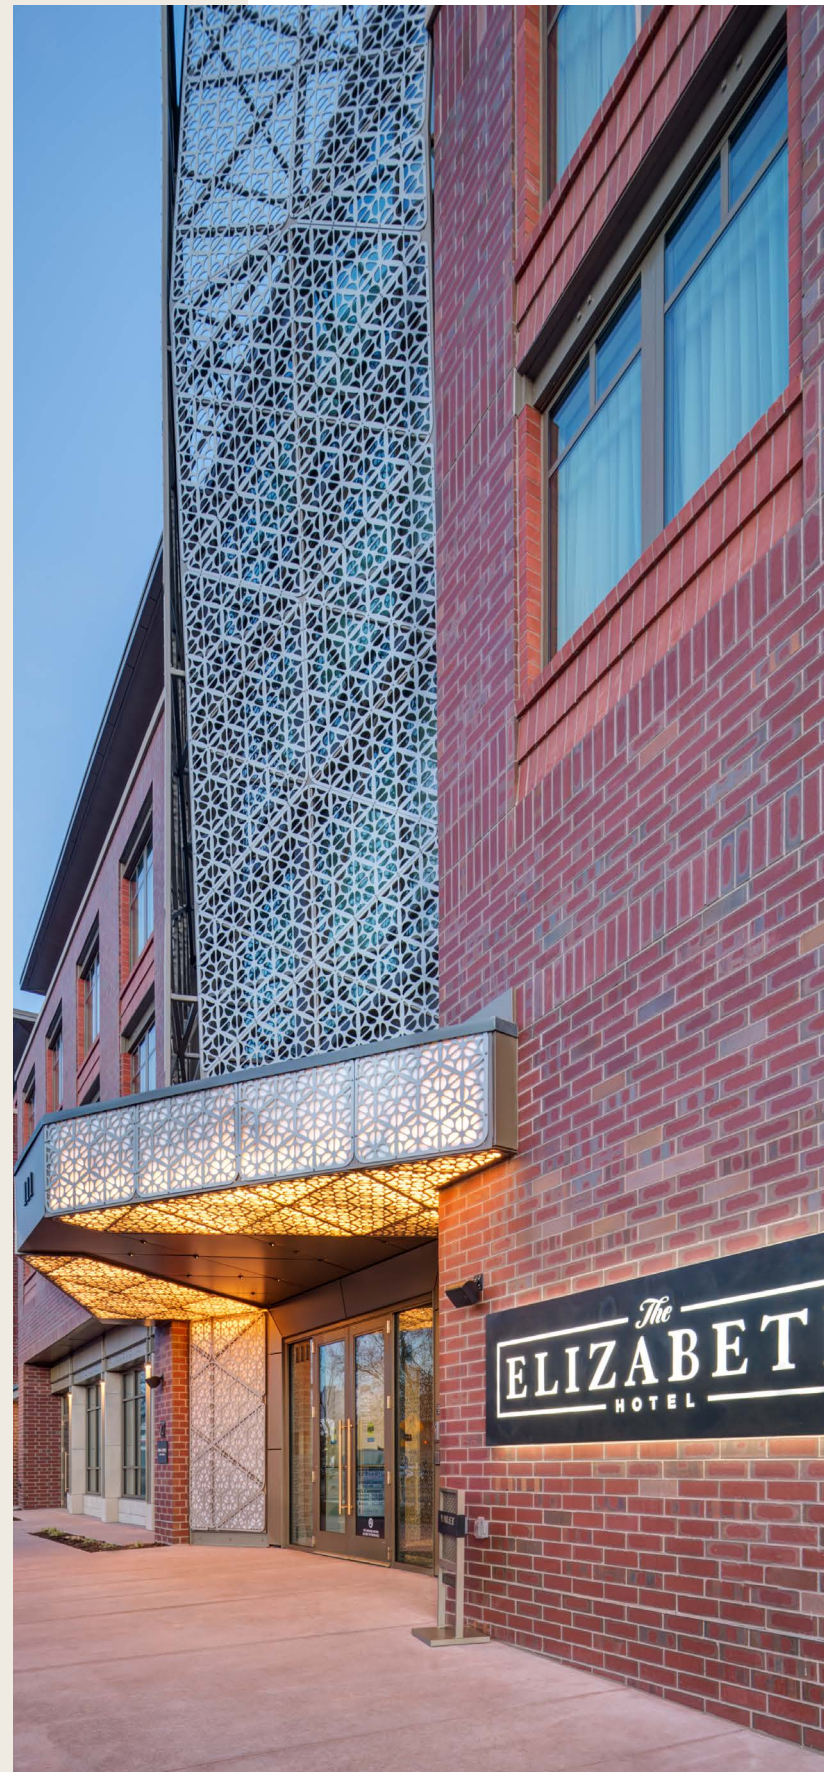

- Light filtration and airflow study
- Product certification that substitutes for PE stamp
- Each standard pattern is rated for performance, is customizable, and with out cost increases for progressive patterns that change across an array of patterns

Brise Soleil & Architectural Scrims

BENEFITS

- Heat gain reduction and glare analysis
- Customization of pattern / panel system for approvals
- Detail specifications for performance and clarity for contractors

Rainscreen & Facades

BENEFITS

- Building envelop integration
- Thermal bridging and vapor barrier solutions
- Coordination with contractors for field solutions

Balconies & Rooftop Guardrail

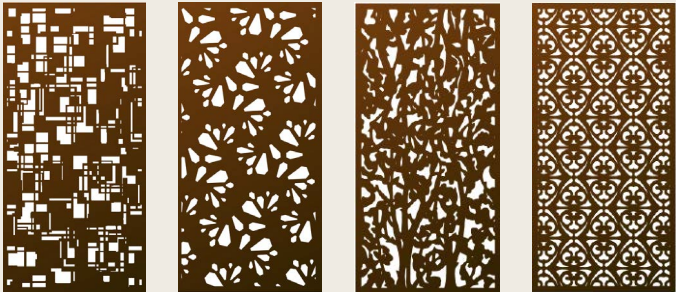

BENEFITS

- Pattern customization for aesthetics and safety
- Recommended miscellaneous metal installers where needed
- Custom fabrication for panel rigidity

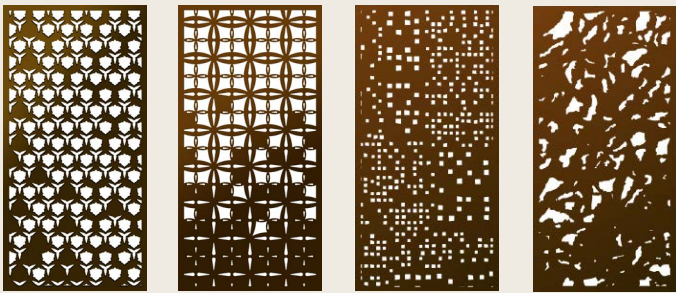

A Pattern for Every Purpose

Our certified, pre-engineered, versatile designs cover the largest range of patterns across any aesthetic that exceed standards for flexibility and structural integrity. *For full pattern selection, visit parasoleil.com/patterns*

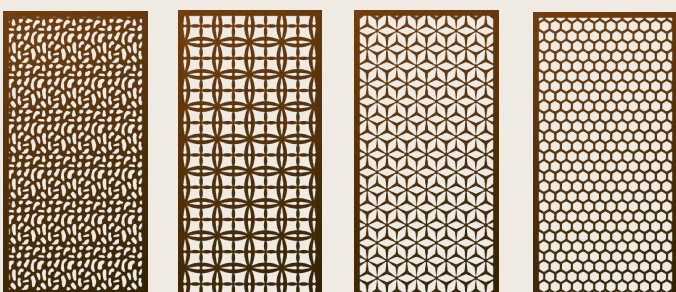

STANDARD

- Online library for standard patterns
- All priced the same

PROGRESSIVE

- Customize any standard pattern
- Carry design language across property

MODULAR FOR MESH

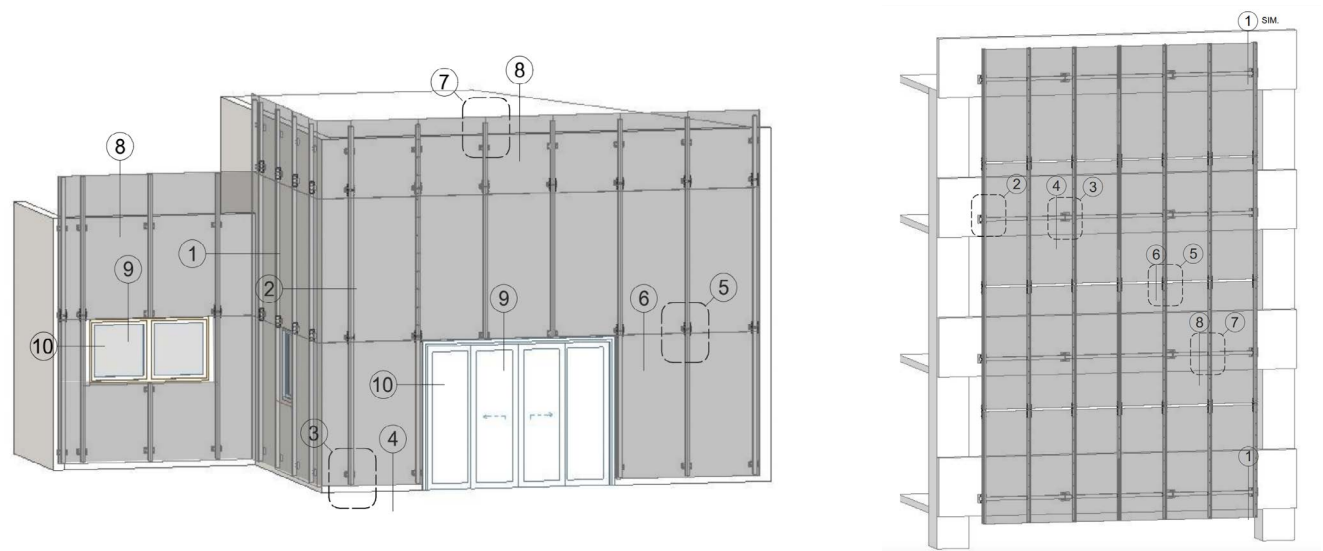

- Overlays
- Pattern Inverts
- Consistent structural stability

Mounting Options

Our systems provide full control to dictate the details of the installation. We’ve thought of it all, from thermal expansion gaps to color coordinated fastener heads to drill access and backlighting – we’ve got options.

PARACLAD™ SYSTEM

Standard pre-engineered substructure, for seamless integration with any panel array.

PARACLAD™ 100 SERIES
Verticle structure only

PARACLAD™ 200 SERIES
Includes verticle and horizontal structure

ALTERNATIVE MOUNTING METHODS

Our brackets are made to give maximum flexibility for field tolerance while also simplifying the installation process.

- PSO System
- Direct Mount
- Z-Girts
- Hat Channels

ParaClad™ System

Specifiers are now able to include an entire system of decorative aluminum panels, aluminum framing, connections, and even nuts and bolts in their projects—all designed, engineered, and manufactured by Parasoleil.

PARACLAD™ SYSTEM

Span across glazing and large openings

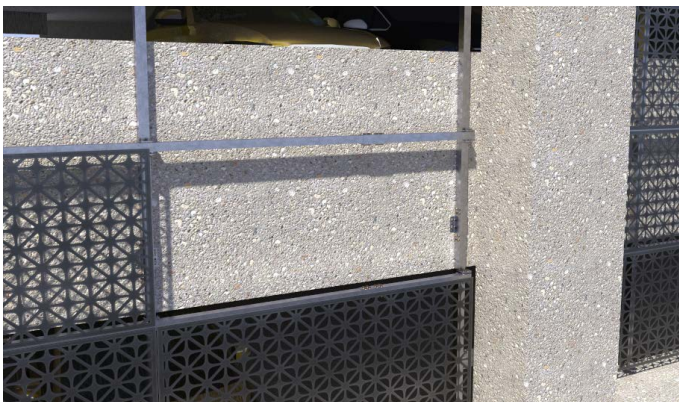

PARALITE SYSTEM

Simple wall-mounted rainscreen patterns

PARACLAD™ 100

PARACLAD™ 200

All systems are customized during early stage design assist to meet budget and site conditions

Design Assist Services

There is no need to be an expert in planning and designing your panel system. Our design assist services allow you to tap into our decades of design, engineering, and manufacturing expertise.

SERVICES FOR PROJECT SPECIFIC NEEDS

- Preliminary engineering
- Spec writing
- Custom assembly design
- Impact study
- Custom pattern development
- Qualify for public art within budget
- Mock-ups and submittal package

ALFA
ART LAB FOR ARCHITECTURE

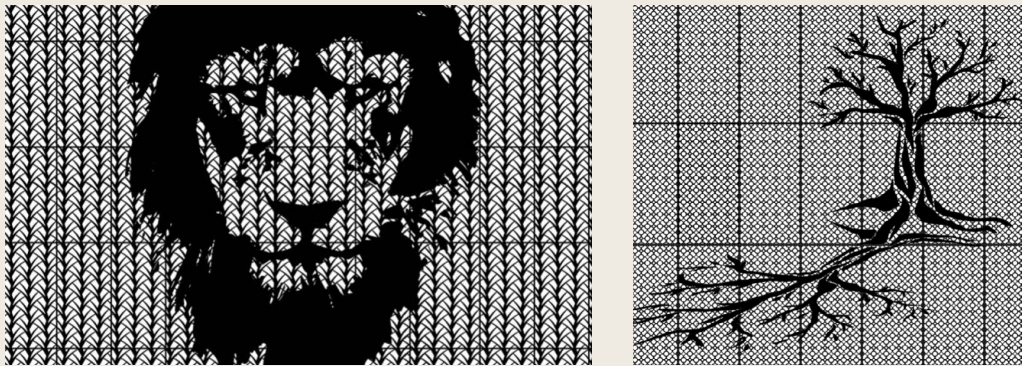

ALFA is a team of experts dedicated to exploring and specifying the best tools and resources that Parasoleil has for any project. Starting with internal research and development, cutting-edge engineering and manufacturing innovations, and incessant project follow up that measures the impact our panels have on a space.

MESH

MESH (Modular Engineered Shadowgraphing) is a new innovation in pattern development that allows all users to take complete advantage of Parasoleil’s engineered standards while simultaneously creating unique, fully custom arrays of aluminum panels as a canvas for their art, design, client’s brand, or just versatile creativity.

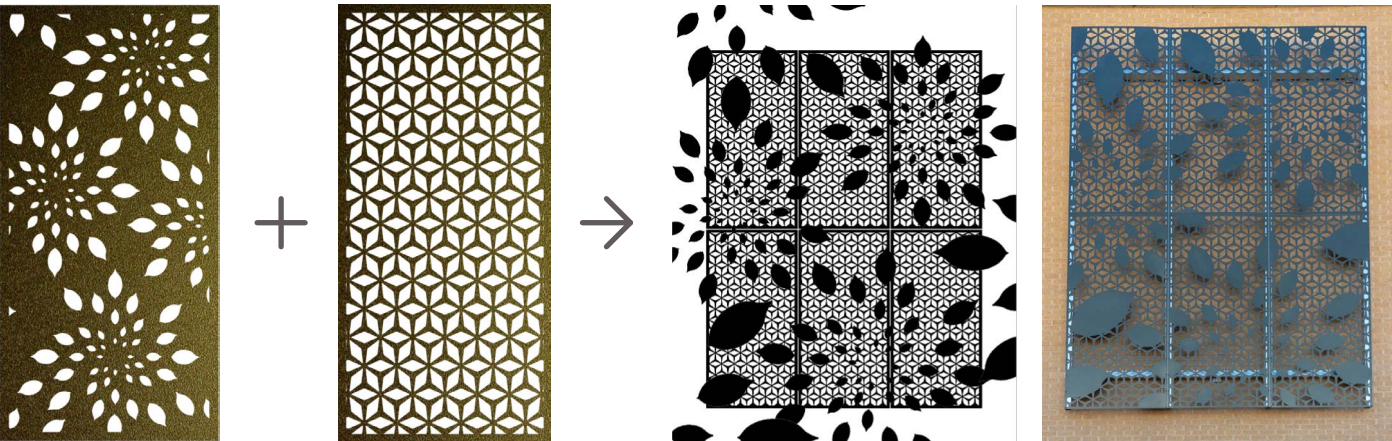

CUSTOM PATTERN EMBEDS

Take a graphic, image, branding, or any macro-pattern and embed that pattern into the MESH pattern.

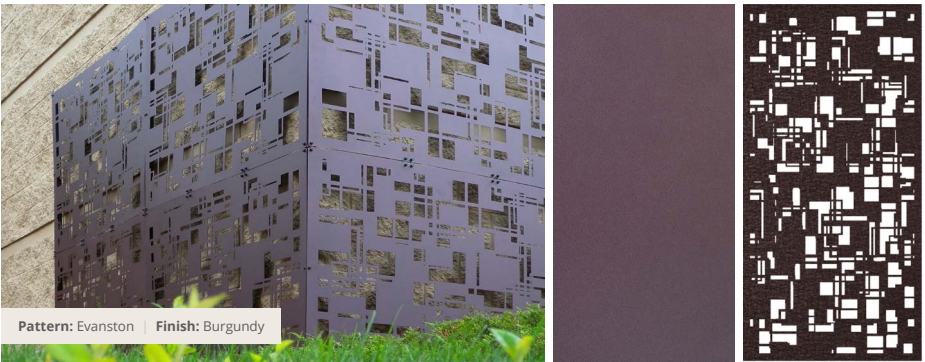

PATTERN LIBRARY CUSTOMIZATIONS FOR EMBEDS

Take the inverse of one of our existing patterns so the cut outs become the solids, and lay that on top of MESH to highlight the contrast between geometric and continues.

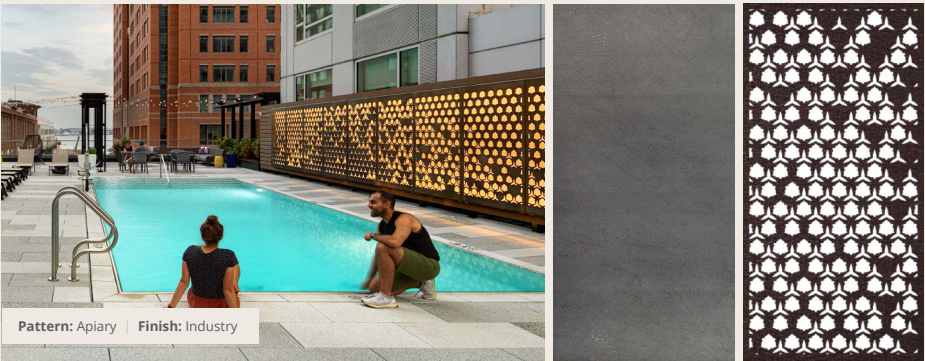

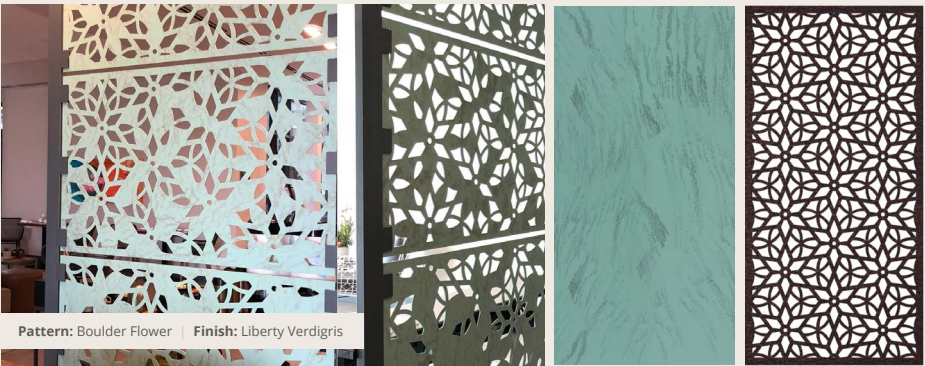

PATTERN ONLY

Elevate your façade by upgrading your design from a simple perf panel to a site-specific modular panel – adding the artistic element of unique shapes and movement without overwhelming the aesthetic.

PROGRESSIVE

Customize the same pattern for different site requirements, but carry the design language across the property.

How To Work With Parasoleil

QUALIFY THE PROJECT

Making sure Parasoleil is the right partner allows the team to consider every detail.

DEFINE THE DESIGN INTENT AND SITE CONDITIONS

Prior to quoting, understand the goals and constraints.

COLLABORATE DESIGN WITH PRELIMINARY ENGINEERING

Pairing engineering with the design process provides flexibility and immediate feedback for cost implications.

SPECIFY THE PROCESS AND PERFORMANCE THAT PROTECTS THE VISION

Avoid delegated design in drawings and specs will reduce the risk of scope cuts.

COORDINATE SCHEDULES, BUDGETS, AND INSTALLATION WITH GC

Aligning expectations gives GC's confidence that Parasoleil has the necessary experience to lower the contractor's risk.

SUPPORT THE INSTALLER WITH FIELD CONDITIONS, STAGING, ETC.

Taking a project from paper to installation requires flexibility, open communication, and responsive solutions.

EVALUATE IMPACT ON PLACEMAKING AND DESIGN INTENT

Understanding the impact of Parasoleil systems within a space informs future product development and design process.

Staying in the Spec

Properly specifying Parasoleil is critical to ensuring that your design stays in the project and your product selection is defensible against value engineering. Make sure to connect with a Parasoleil representative to confirm your spec will stand.

If the product is at risk of being removed or replaced from your project, remember the following critical advantages that are always included with the Parasoleil Experience:

- Made in Colorado
- Performance-rated library of standard patterns
- ISO/IEC 17025 accredited 3rd party product certification
- Patented system hardware by manufacturer
- Shop drawing and panel layout support by our internal design team
- 10-year powdercoat finish warranty
- Proprietary pattern and finish options that cannot be replicated elsewhere
- Openness percentage, value-engineering options, and deflection calculations provided by manufacturer
