

Quality Super Durable Finishes

Patina Powder Coat Finishes

Anodized Finishes

DATA SHEET

Parasoleil Finishes

Parasoleil's award-winning proprietary finishes for aluminum are specifically developed for their versatility, durability, and beauty to match the timeless qualities of our architectural panels. The variety of coatings and colors appeal to diverse environments and design goals.

BENEFITS & FEATURES

- AAMA 2604 compliant 2-step powder coat system for challenging environments
- Finished on both sides for maximum versatility
- UV stable, no VOCs, and exterior grade

PROPRIETARY FINISHES

- **Quality Super Durables:** Consistent in color and texture, these finishes are versatile.
- **Patina Powder Coats:** With a varied aesthetic, these finishes have unique markings, tones and qualities based on natural materials and aged metals. Due to the unique nature of the finishes, results will vary per panel.
- **Anodized Finishes:** Class 1 clear coat anodized finish increases the durability of aluminum while aesthetically expressing the nature of the material.

Thoroughly tested for excellence, all finish options give maximum corrosion protection and aesthetic integrity.

CUSTOM FINISH

Custom panel finishes for aluminum are available for specified powders. A color matching process is not offered. All custom finishes are subject to approval by Parasoleil and are not covered by Parasoleil's standard finish warranty.
