PROJECT DETAILS

SITUATION

The ceiling of the Archer Hotel in Napa, CA was a perfect opportunity to add a breathtaking element of hanging laser cut metal panels in a unique and impactful way. The design team needed something light, natural, and ethereal to add to the 'wine country retreat meets urban beat' style of the hotel, but also something sturdy and lasting that could support itself with minimal framework in the installation.

SOLUTION

The end result was a perfect melding of the soft curved lines of the factory rolled 1/4" aluminum panels to match the exact radius of the wooden arches with the rigid thickness of the structurally sound custom pattern - metal panels. The pattern was developed in partnership between LK Architecture and Parasoleil to fit the exact architectural language of the space, leaves and vines.

Parasoleil

From the Client

OWNER

Archer Hotel

By featuring a hanging canopy of grape vine inspired pattern inside the hotel, the space acts as a gateway between the outside and the inside, inviting guests to enjoy the in-between.

SPECIFIER

LK Architecture

The project required a custom pattern solution, but the architects weren't required to start from scratch by utilizing Parasoleil's pattern library of pre-engineered options and modifying one for this exact application.

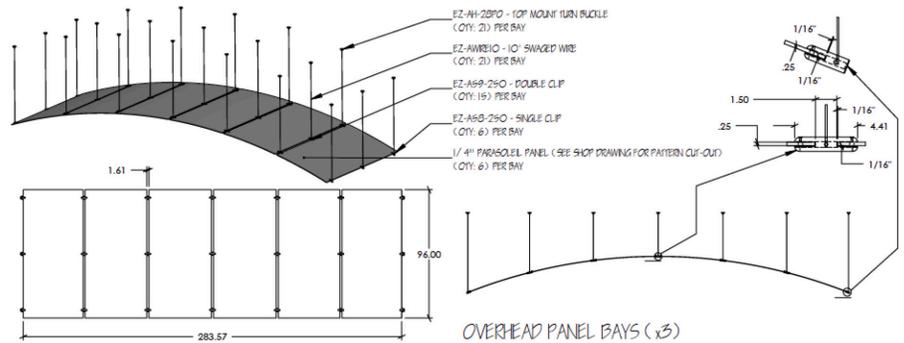

CONTRACTORS

Deacon

With the guidance of Parasoleil's team ALFA, the contractors were provided the ideal third party fastening system to suspend these panels in perfect harmony with the surrounding elements.

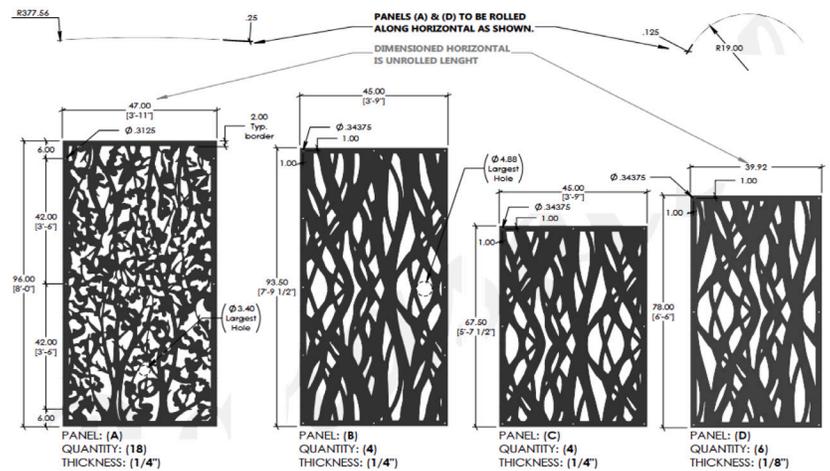

PANEL

- 1/4" and 1/8" aluminum
- Ceiling panels rolled
- Column wrap panels - 3' diameter, 20' tall
- Pre-drilled fastener holes for stand-off mounting on columns

FASTENING SOLUTIONS

Parasoleil discovered and sourced the fastening solution through a third party hardware manufacturer that supplied the anchor brackets and hanging cable system to effectively "float" the panels above while anchoring them solidly into the ceiling.

COLUMN WRAP

The vine-themed pattern found it's way onto the main column behind the bar in a column wrap application, and around the elevator doors on the first two floors as well, tying the experience of the entry ceiling into other parts of the lobby as well for a cohesive use of the aluminum panels in the whole space.

Parasoleil

All Parasoleil finishes are warranted for 10 years and all projects are backed by the Parasoleil brand. Patterns and hardware are protected under copyright and patent law, respectively.
